

# Curriculum Vitae

# James Nisbet

I am a fast learning, capable, confident person with a friendly and easy-going manner, one who enjoys a challenge and attaining goals set. I have the ability to do and learn almost anything when I put my mind to it, and this makes me a valuable asset to any employer. I am very artistic and have a strong passion for design, this shows in the end result of anything I do. I also have a keen interest in programming, which makes me very flexible in the work-place.

I have experience working closely with a large variety of clients; ranging from government organisations such as the Broadcasting Standards Authority, to charities such as Ronald McDonald House, to huge traffic websites such as Dunbar Sloane.

I have a number of years of design experience, working with multiple mediums; ranging from web to print. I have planned, designed and developed several web-based applications, working with technologies such as PHP, MySQL and JavaScript.
